

NOTICE

Dated: 16/08/2016

Dear colleagues,

We all know the harmful effects of Fireworks and Crackers. Need is to educate the students about it. Recently Delhi University issued a notification no. DU/106/LEGAL-Misc./2016/1134 dated 16.6.2016 and directives passed by the Hon'ble Supreme Court of India on PIL (W.P. No. 728/2015) matter for harmful effects of Fireworks & Crackers:

The SPM (suspended particulate matter) levels rise to a large extent during Diwali. It can cause throat, nose & eye related problems which can later develop into adverse health hazards. It can lead to headaches & reduced mental acuity when it reaches the level of 100 ppm. It has much more severe effects in people with heart, respiratory or nervous system disorders. It can aggravate problem for people suffering from cold, allergies or coughs and can also cause congestion of throat & chest. Increase amount of noise has harmful effects on animals as well as humans. Standard decibel level for humans is 60 dB. Increase in the decibel level can lead to: Restlessness, Temporary or Permanent Hearing Loss, Fidgetiness, High Blood Pressure, Anger, Heart Attack, Sleep Disturbance and Impulsiveness. Can lead to withdrawal behaviour or hyperactivity in pregnant women, children & those suffering from respiratory problems. Fireworks can also cause health problems like: Chronic bronchitis, Common Cold, Allergic Bronchitis, Bronchial Asthma, Sinusitis, Chronic Obstructive Pulmonary Diseases (COPD), Emphysema, Rhinitis, Pneumonia and Laryngitis.

It results in smog which can reduce visibility thereby leading to accidents as well as is toxic if inhaled. It can also cause water contamination and acid rains. It results in air pollution that creates carcinogenic sulphur compounds and airborne arsenic effect. Green light produced in fireworks displays comes from Barium that is radioactive and poisonous. Blue colour produced from copper compounds comes from dioxins linked to cancer. Different effects are produced by using different chemicals that are linked to a host of health and respiratory problems.

You are requested to tell the students not to buy and use fireworks for saving our environment.
